

Alaska Airlines Inflight Entertainment – Know the Facts

Air travel can be stressful, especially during long journeys where passengers spend hours seated in the cabin. To make flights more comfortable and enjoyable, airlines now invest heavily in inflight entertainment systems. Alaska Airlines is no exception. The carrier offers a modern, device-based entertainment experience that keeps passengers engaged from boarding to landing.

This detailed guide covers everything you need to know about [alaska airlines inflight entertainment](#), including movies, TV shows, Wi-Fi services, free messaging, supported aircraft, and essential tips for a smooth onboard experience.

Inflight Entertainment Is Available in Alaska Airlines

Passengers flying with Alaska Airlines can enjoy a wide range of entertainment options directly on their personal devices. Instead of traditional seatback screens, the airline uses wireless streaming technology that allows travelers to access content through their smartphone, tablet, or laptop.

With a library of over **800 movies and TV shows**, travelers can choose from popular films, trending TV series, kids' content, and documentaries. This clearly confirms that [inflight](#)

[entertainment is available in alaska airlines](#) on most routes, offering flexibility and convenience for modern travelers.

The airline also partners with well-known entertainment providers such as HGTV, Food Network, Rebel Girls, American Indian Film Institute, Vooks, and Sub Pop, giving passengers access to diverse and inclusive programming.

Does Alaska Airlines Have Inflight Entertainment?

Yes, Alaska Airlines provides inflight entertainment on the majority of its flights. Once the aircraft reaches cruising altitude, passengers can connect to the onboard Wi-Fi network and access the entertainment portal through their web browser.

Blog post in less than 10 minutes

If you are wondering [does alaska airlines have inflight entertainment](#), the answer is absolutely yes. The airline focuses on ease of access, allowing passengers to enjoy content without downloading anything in advance in most cases.

This browser-based streaming model ensures compatibility with both iOS and Android devices, making it simple for travelers to start watching within minutes.

Alaska Airlines Inflight Entertainment App and Device Compatibility

Alaska Airlines generally does not require a dedicated entertainment app. Most aircraft allow passengers to stream movies and TV shows directly through their device's web browser. However, some older aircraft may require the Gogo Video Player to access stored content.

Important points to note:

- No mandatory app download on most flights
- Works on smartphones, tablets, and laptops
- Compatible with iOS and Android devices
- Personal headphones are recommended

Although many travelers search for an Alaska Airlines inflight entertainment app, the airline's browser-based system keeps things simple and user-friendly.

Alaska Airlines In-Flight Wi-Fi Services

To complement its entertainment offerings, Alaska Airlines provides two types of Wi-Fi services that allow passengers to stay connected while flying.

Satellite Wi-Fi (Streaming-Fast)

Satellite Wi-Fi is available on most Alaska Airlines aircraft and supports high-speed internet usage, including video streaming.

Key details:

- Cost: \$8 per flight
- Supports Netflix, Hulu, and other streaming platforms
- Fast and reliable connectivity
- Not available on flights over the Arctic Circle

Passengers using this service can enjoy a seamless online experience similar to ground-based internet.

Aircraft With Streaming-Fast Wi-Fi

- Boeing 737 MAX
- Embraer E175
- Boeing 737-800
- Boeing 737-900ER
- Boeing 737-900 (excluding one aircraft)

Basic Wi-Fi

Basic Wi-Fi is designed for light usage such as emailing, browsing websites, and online shopping.

Service highlights:

- Not available on flights to Mexico, Costa Rica, Hawaii, or parts of Alaska
- Cost:
 - \$8 on Embraer E175 aircraft
 - Up to \$24.99 on Boeing 737 aircraft

Supported aircraft include the Boeing 737-700 series and one Boeing 737-900. Streaming and large file transfers are not supported under this plan.

Complimentary Messaging Service

One of the most convenient features offered by Alaska Airlines is free inflight texting. This service allows passengers to send and receive messages without purchasing a Wi-Fi plan.

How to Use Free Texting

1. Enable airplane mode on your device
2. Connect to the onboard Wi-Fi network
3. Open your web browser
4. Visit AlaskaWiFi.com
5. Select the "Free Texting" option

Important Notes About Free Texting

- Supports messaging apps like WhatsApp, iMessage, Facebook Messenger, Telegram, and Google Messages
- Photo, video, and SMS messaging are not supported
- Available only on flights with inflight internet
- Messaging speed may vary depending on demand
